Top Projects

E-Commerce Project
This is a web application project in which I have used ASP.NET Core MVC as Backend.
Bootstrap and jQuery as frontend. Here MSSQL Server database is used to store the details. I
also used here Identity and Entity Framework core.

Online Library Management
In this project user can add a book to his/her account.User can be purchased book by paying
required money.User have authority to make CRUD operations to his/her own account.
Admin have authority to handle Book Management and User Management part.
In this project I used here Laravel framework, MySQL database as Backend, HTML, CSS
and Bootstrap as Frontend.

User Management
This is a just API. I made this API by using Node.Js, Express.Js, Sequelize MySQL database.

Todo Apps
In this project user can create, update and delete todos. Node.Js, Express.Js and MongoDB
are used as backend part. React.Js and vanilla JavaScript are use as frontend part.
